Index.js

```
import ReactDOM from 'react-dom'
import App from './App.js'
ReactDOM.render(
  <App notes={notes} />,
  document.getElementById('root')
)
```

App.js

```
import React, { useState } from 'react'

const App = () => {
  const [ counter, setCounter ] = useState(0)

  const increaseByOne = () => setCounter(counter + 1)
  const decreaseByOne = () => setCounter(counter - 1)

  return (
    <center>
      <div >
        <h2>Counter</h2>
        <button onClick={increaseByOne} style={{background:"blue",marginRight:'30px'}}>
          INCREMENT
        </button>

        <button onClick={decreaseByOne} style={{background:"red",marginLeft:'30px'}}>
          DECREMENT
        </button>
        <h1>{counter}</h1>
      </div>

    </center>
  )
}
```

```
)  
}
```

export default App

Output:
